

Series 7V Privacy Railing

The newest way to ensure what is private remains that way

That is Private!

- Privacy seems to become more difficult to come by each passing day...but we are doing something to change that!
- New Superior Aluminum privacy rail eliminates nosy neighbors, hides bulky machinery or dumpsters, and privatizes any other location you want to hide from peering eyes
- No messy, complex installation processes are required as each section is built pre-assembled with panels in place
- The secret is the specially engineered tongue and groove setup that allows privacy panels to lock into the pickets and remain rigid
- Privacy railing is built in three PPG Duracron paint finishes

White

Black

Dk. Bronze

- Wood, vinyl, iron, and other materials will rot, warp, and rust in just a few years, jeopardizing your project's aesthetics and your fence's structural integrity...meanwhile aluminum privacy rail will remain sturdy and beautiful for a lifetime with no maintenance needed!

Aluminum privacy rail is durable and maintenance-free....

Unlike other materials

Best Used For:

- Shared balcony units
- Hiding machinery
- Concealing dumpsters or other waste receptacles
- Private property seeking an added level of security
- Anywhere privacy is valued or sightlines need disrupted
